Why should you utilize interactive training?

“THE BENEFITS OF ONLINE INTERACTIVE TRAINING”

Interactive Training is another resource CCMSI provides to its clients in an effort to help ensure a safe and healthy work environment. Interactive Training offers the following benefits:

1. Convenience. To utilize the training resources organizations need a computer and access to the Internet. Training can be conducted in offices, break rooms, job-site trailers, library, at individual homes or while traveling.
2. Timing. Train when you need to train or when the time is available. The training is available 24 hours a day, seven days a week. Training can be arranged based on that day's work schedule. An organization can arrange training to coincide with production demands. Modules are designed to provide the user with an overview of a safety subject.
3. New employee orientation or refresher training. The various safety modules are an excellent tool to be utilized for new employee orientation or refresher training. Each module can be completed within 30 minutes from start to finish.
4. Consistency. Organizations can ensure each employee receives the same consistent training message.
5. Comprehension. Completion of each module requires the user to complete a quiz, ensuring comprehension of the safety-training subject.
6. Recordkeeping. Upon completion of the training each employee receives a certificate of completion stating that they have passed the safety module. In the future, there will be an addition to our recordkeeping options, where a record is kept of each employee within your organization that took the module, as well as their quiz score.
7. Resources. Interactive training allows an organization to increase their manpower and allocation of resources.
8. Cultural Diversity. Modules can be written in different languages allowing safety training to be provided to diverse workforces.

If you would like additional information on CCMSI's Interactive Training, please call George Peterson at 800.252.5059, ext. 1385.
